Note: Our systems are modular. If larger sizes are required, they can be added side by side and manufactured to the desired size.

Side section panel collection distances and numbers

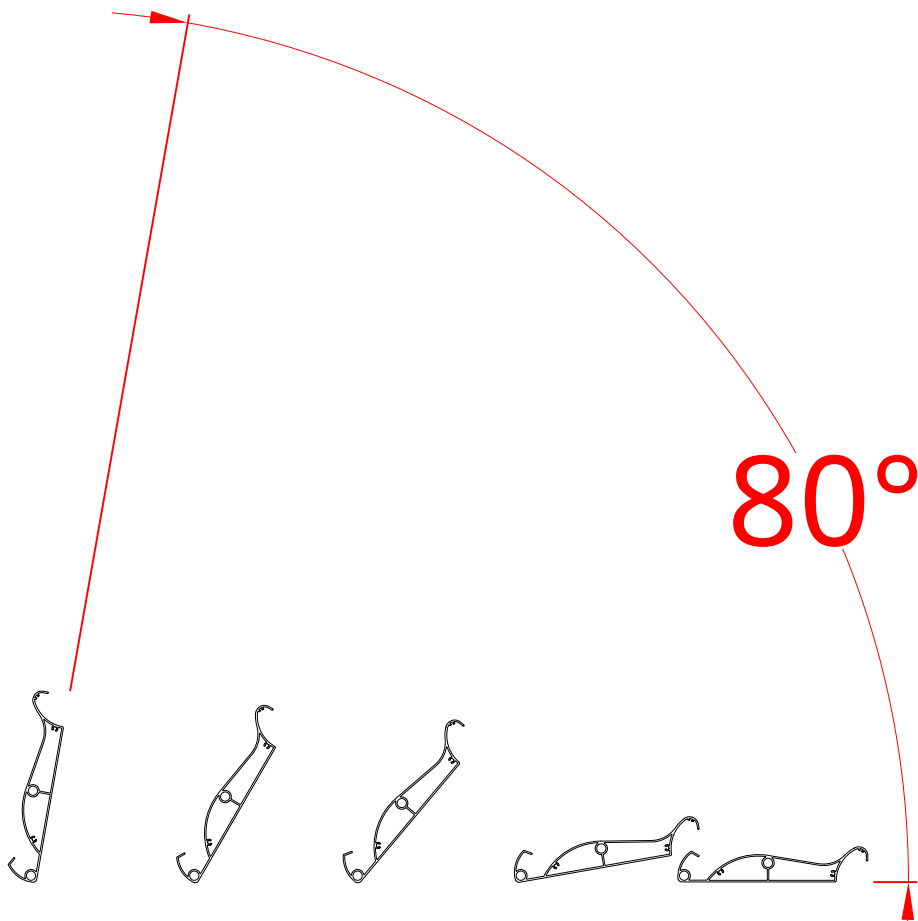

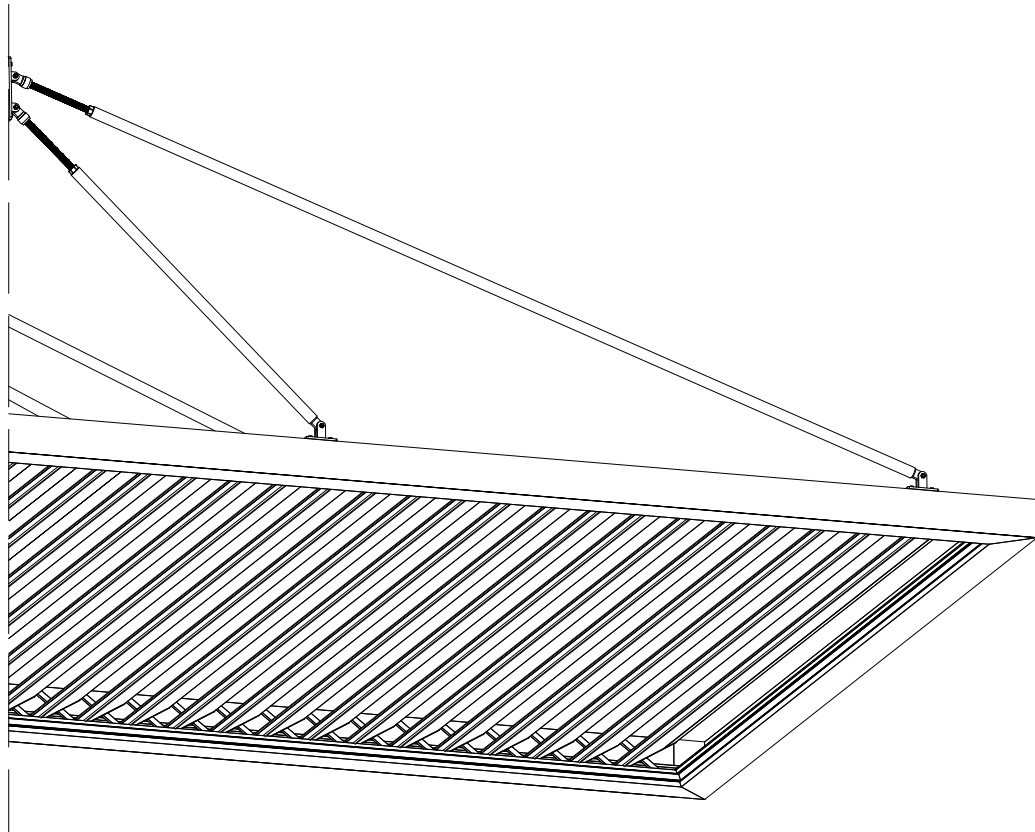

PANEL SAYISI	PANEL COLLECTION DISTANCE	OPENING
8	654 mm	2012 mm
9	712 mm	2228 mm
10	770 mm	2444 mm
11	828 mm	2666 mm
12	886 mm	2876 mm
13	944 mm	3092 mm
14	1002 mm	3308 mm
15	1060 mm	3524 mm
16	1118 mm	3740 mm
17	1176 mm	3956 mm
18	1234 mm	4172 mm
19	1292 mm	4388 mm
20	1350 mm	4604 mm
21	1408 mm	4820 mm
22	1466 mm	5036 mm

Product expansions are determined according to the number of panels.

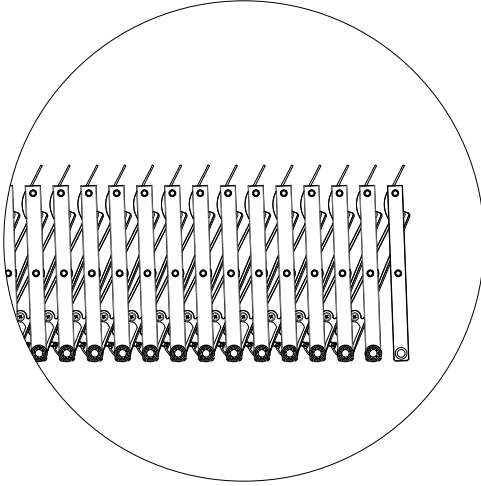

It is calculated for 8 panels. 58 mm should be added for each additional panel.

Panel angles

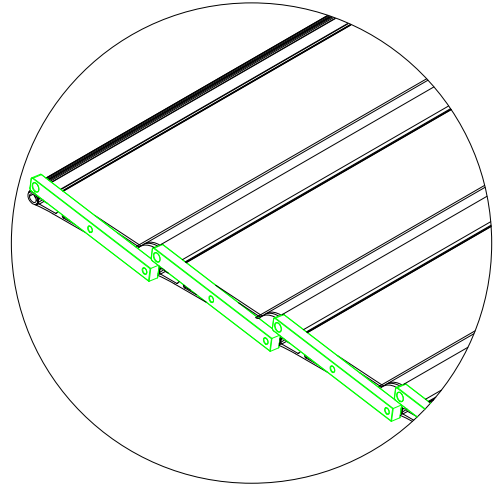

Panel angles move from zero to 80 degrees. It also retracts at the same time.

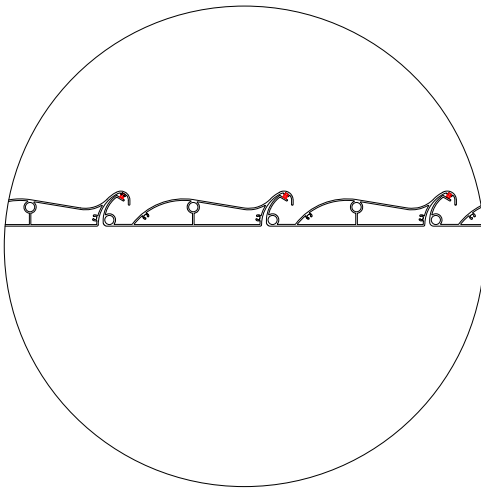

Sealing and joining details

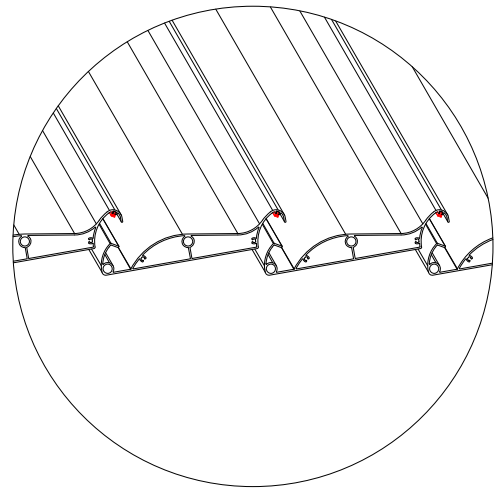

Panels are connected to each other
connections are made as shown in the
drawing.

Panels are connected to each other
connections are made as shown in the
drawing.

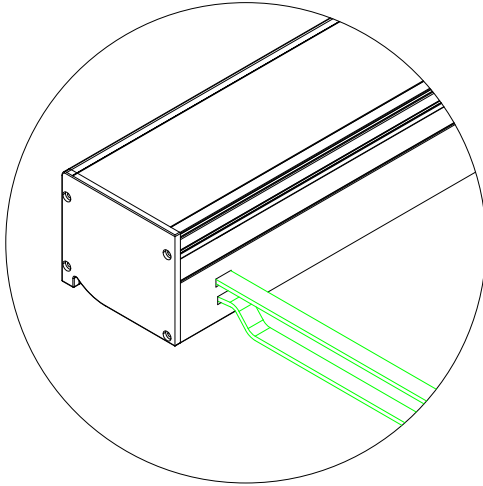

It provides sealing thanks to the
wicks when the panels are closed.

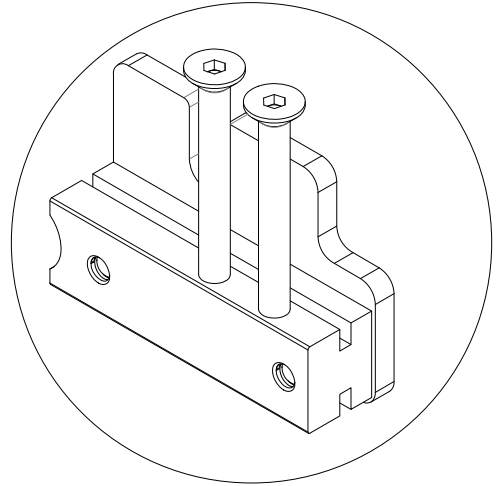

Open state of the panels wicks

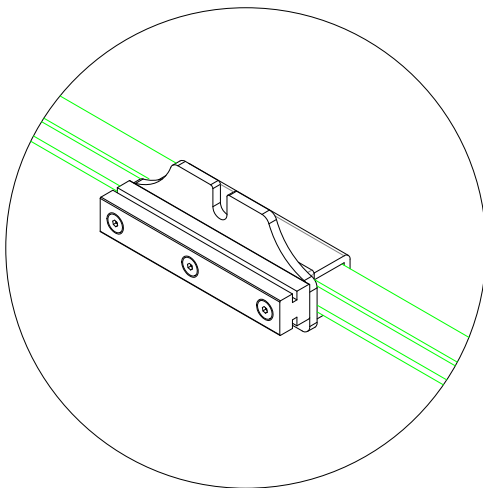

Timing belt and lock mechanisms

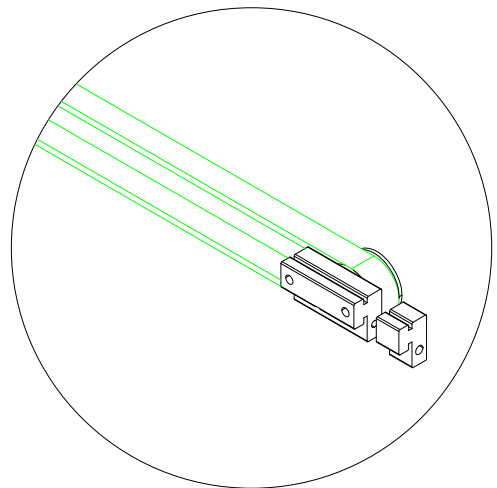

Timing belt engine
input and output to the box.

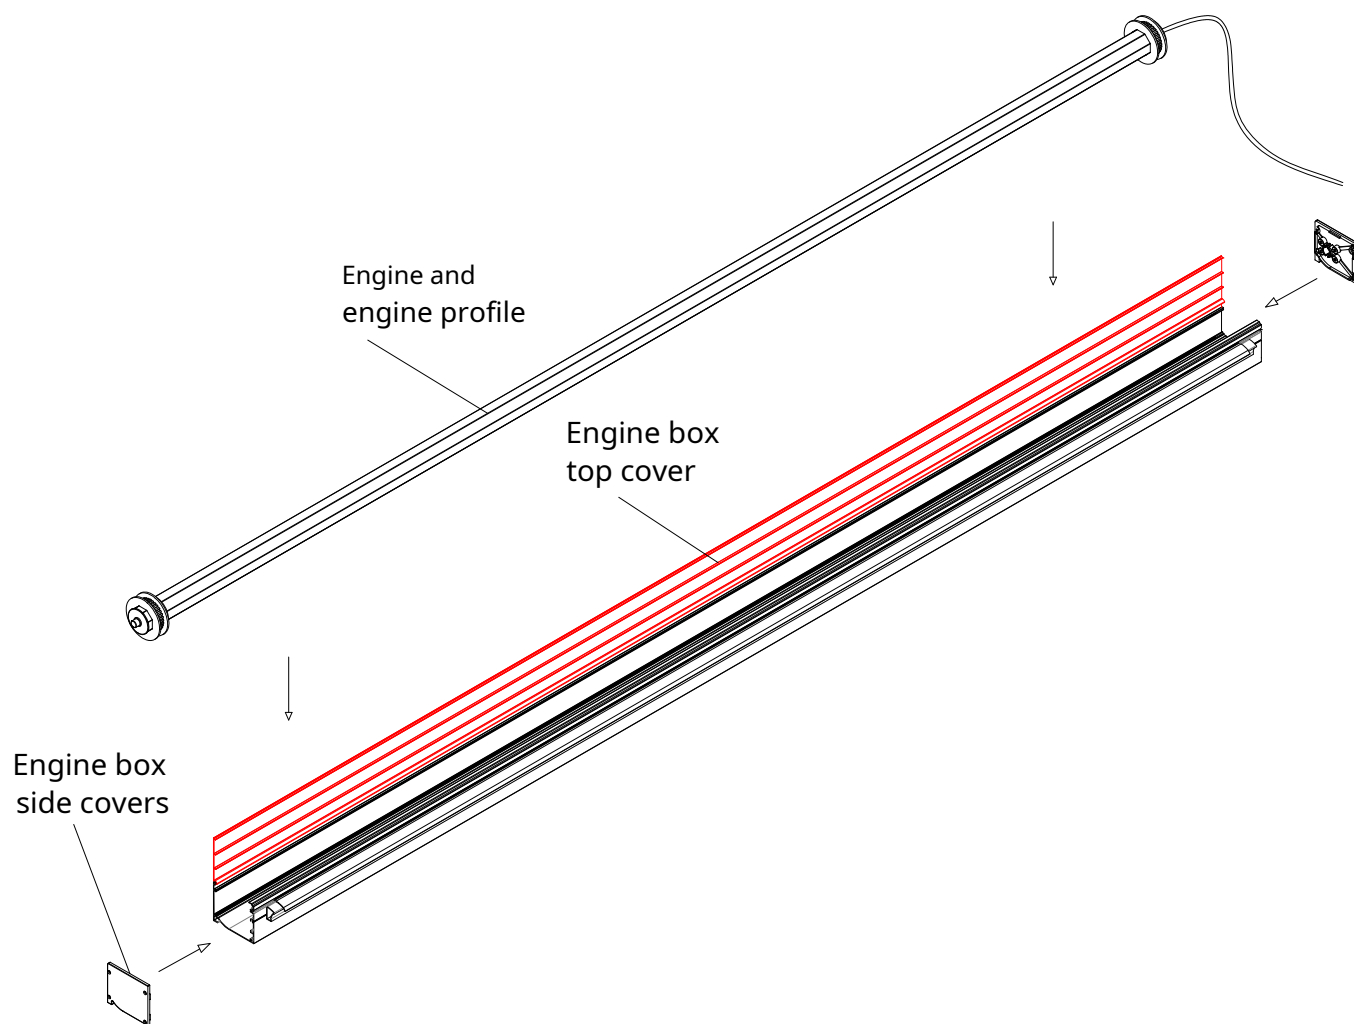

Rear locking mechanism

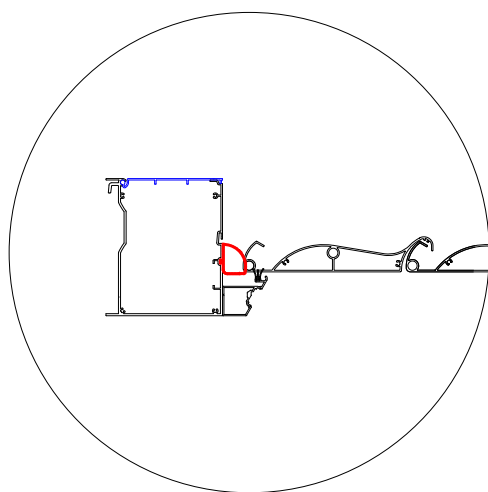

Front lock mechanism and
timing belt assembly tool
set.

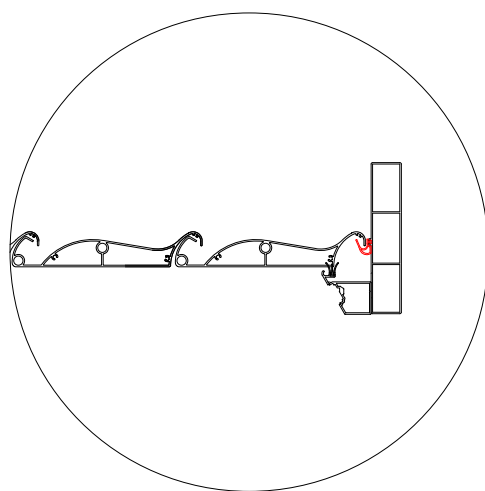

Timing belt tensioner kit

The engine box side covers are fixed with 4.8x32 Phillips countersunk head self-drilling screws DIN 7504P.
